Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ARKANSAS, Southeast

(AR-Z074) ASHLEY, (AR-Z075) CHICOT

01/09/11 08:00 CST	0.15M	Heavy Snow
01/09/11 20:00 CST	40K	

Strong and cold high pressure had settled over southeast Arkansas by January 8th, 2011 bringing cold temperatures to the region. An area of low pressure transiting the northern Gulf of Mexico on January 9th brought an influx of moisture to Arkansas that combined with the cold air mass already in place bringing heavy snow, and sleet to the region.

LOUISIANA, Northeast

(LA-Z015) RICHLAND, (LA-Z016) MADISON

01/09/11 07:00 CST	80K	Ice Storm
01/09/11 21:00 CST	40K	

(LA-Z007) MOREHOUSE, (LA-Z008) WEST CARROLL, (LA-Z009) EAST CARROLL

01/09/11 08:00 CST	0	Winter Weather
01/09/11 21:00 CST	0	

Strong and cold high pressure had settled over northeast Louisiana by January 8th, 2011 bringing cold temperatures to the region. An area of low pressure transiting the northern Gulf of Mexico on January 9th brought an influx of moisture to the Gulf Coast states that combined with the cold air mass already in place to bring heavy freezing rain and sleet to the region.

MISSISSIPPI, Central

ATTALA COUNTY --- 1.2 ENE BOYETTE [33.04, -89.81], 7.0 N ETHEL [33.22, -89.47]

01/01/11 00:02 CST	3M	Tornado (EF3, L: 23.45 mi , W: 1300 yd)
01/01/11 00:26 CST	2	Source: NWS Storm Survey

The tornado began in the vicinity of State Highway 12, east southeast of Durant. The tornado moved roughly east-northeast, initially producing damage of EF1 intensity to trees, and damaging the roof of at least one home. As the tornado approached State Highway 19, it intensified and began causing extensive tree damage, snapping and uprooting hundreds of trees. After crossing Highway 19, it caused extensive damage to a church conference center, heavily damaging the roof of the main church building and causing major damage to several camp buildings. In this area, the tornado also caused significant roof damage to several homes and destroyed a number of outbuildings. From here, the tornado continued east northeast, continuing to cause major tree damage as it crossed state Highway 35 at Hesterville. As a wide, strong tornado moving through a heavily forested area, this tornado was a major destroyer of timber, snapping or uprooting thousands of trees. The tornado eventually weakened and dissipated to the north of Ethel. There were two injuries north northeast of the Sallis Community. Additionally, several vehicles were damaged near Sallis. Maximum winds were around 145 mph.

SIMPSON COUNTY --- 2.1 SSE BRAXTON [32.02, -89.97]

01/01/11 00:12 CST	0	Thunderstorm Wind (EG 50 kt)
01/01/11 00:12 CST	0	Source: Broadcast Media

A few trees were blown down near Braxton.

HOLMES COUNTY --- 1.0 N DURANT [33.09, -89.87], 1.1 S DURANT [33.06, -89.87], 2.2 NE ABERDEEN JCT [33.05, -89.84], 2.7 ENE DURANT [33.10, -89.83]

01/01/11 00:25 CST	1K	Flash Flood (due to Heavy Rain)

A tree and a power line were blown down.

Storm Data and Unusual Weather Phenomena - January 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
WEBSTER COUNTY --- 2.8 SSW BELLEFONTAINE [33.61, -89.33], 2.8 SSW BELLEFONTAINE [33.61, -89.34], 2.7 SSW BELLEFONTAINE [33.61, -89.34], 2.6 SSW BELLEFONTAINE [33.61, -89.33]				
	01/01/11 00:30 CST		1K	Flash Flood (due to Heavy Rain)
	01/01/11 01:00 CST		0	Source: Law Enforcement
Heavy rainfall of between 3 and 4 inches caused a road west of Walthall to go under water for a period of time.				
MADISON COUNTY --- 3.0 NW CANTON [32.65, -90.07], 1.6 SSW SHARON [32.63, -89.94], 1.6 NE MADISON CAMPBELL ARP [32.44, -90.08], 1.5 S CEDAR HILL [32.46, -90.18]				
	01/01/11 00:35 CST		2K	Flash Flood (due to Heavy Rain)
	01/01/11 01:00 CST		0	Source: Law Enforcement
Street flooding was reported in the city of Canton. Rice Road in Madison also flooded.				
CHOCTAW COUNTY --- 1.0 WSW WEIR [33.26, -89.30], 0.5 SW WEIR [33.27, -89.29]				
	01/01/11 00:40 CST		65K	Tornado (EF1, L: 0.61 mi , W: 75 yd)
	01/01/11 00:41 CST		0	Source: NWS Storm Survey
The tornado developed just southwest of Weir and impacted the south parts of the community. The first observed damage was several large pines snapped in the yard of a house. A tree fell on the house and significant roof damage occurred. The tornado continued northeast, snapping and uprooting several more pine trees. As it crossed Main Street, along with tree damage, it also blew the skirting off a mobile home, and caused shingle and other minor roof damage to a church. The tornado then crossed Highway 407, and just east of the highway it caused shingle, skirting, and other minor wind damage to a mobile home, blew the roof off a shed, and snapped several hardwood trees. The tornado dissipated just northeast of this location. Maximum winds were around 95 mph.				
CHOCTAW COUNTY --- 2.5 ENE WEIR [33.28, -89.24], 3.5 SE ACKERMAN [33.28, -89.13]				
	01/01/11 00:46 CST		20K	Tornado (EF1, L: 6.52 mi , W: 75 yd)
	01/01/11 00:53 CST		0	Source: NWS Storm Survey
This tornado snapped and uprooted a number of pine trees along a narrow path. A couple of small outbuildings also had some roof damage. Maximum winds were 90 mph.				
ATTALA COUNTY --- 2.1 SSE MC COOL [33.17, -89.34], 2.5 SSE MC COOL [33.16, -89.34], 2.5 S MC COOL [33.16, -89.34], 2.3 S MC COOL [33.17, -89.35], 2.0 S MC COOL [33.17, -89.34], 1.9 SSE MC COOL [33.17, -89.34]				
	01/01/11 01:05 CST		30K	Flash Flood (due to Heavy Rain)
	01/01/11 01:34 CST		0	Source: Emergency Manager
Due to locally heavy rainfall, a few roads were reported to be under water and a portion of Highway 411 was closed.				
SCOTT COUNTY --- 0.7 N STEEL [32.49, -89.43]				
	01/01/11 01:08 CST		2K	Thunderstorm Wind (EG 50 kt)
	01/01/11 01:08 CST		0	Source: Emergency Manager
A few trees were blown down along King Road and Highway 21.				
OKTIBBEHA COUNTY --- 0.8 NE STARKVILLE BRYAN ARP [33.44, -88.84], 1.9 SSE STARKVILLE [33.44, -88.82]				
	01/01/11 01:15 CST		3M	Tornado (EF1, L: 1.29 mi , W: 250 yd)
	01/01/11 01:18 CST		0	Source: NWS Storm Survey
The tornado began near the south side of the Starkville Airport. As the tornado moved along Miley and Industrial Park Roads, it downed several trees, peeled back the roof and blew in the overhead door on a metal commercial building, and pushed over a semi-trailer. The tornado then crossed the Starkville Sportsplex, blowing over a number of soccer goals and dugouts, and damaging some fencing. The tornado then moved across a couple of apartment complexes along Lynn Lane, where it did its most intense damage. It removed the entire roofing structure of one apartment building, and blew the facade off another building. A number of apartment buildings suffered shingle or fascia damage. After causing this damage, the tornado moved across Louisville Road near the intersection with Academy Road. It blew off part of the roof of a carwash near this intersection, and also caused minor roof and gutter damage to a church. The tornado moved along Academy Road, downing some powerlines and causing some minor roof damage before dissipating. The Starkville ASOS had a wind gust of 52 mph. Maximum winds in the tornado were estimated at 95 mph.				
NESHOBA COUNTY --- 1.2 E HOPE [32.75, -89.23]				
	01/01/11 01:20 CST		2K	Thunderstorm Wind (EG 55 kt)

A tree and a few power lines were blown down northwest of Columbus.				
KEMPER COUNTY --- 2.2 N KELLIS STORE [32.90, -88.77], 5.9 NE KELLIS STORE [32.93, -88.69]				
	01/01/11 02:00 CST		0.60M	Tornado (EF2, L: 4.61 mi , W: 860 yd)
	01/01/11 02:07 CST		0	Source: NWS Storm Survey
The tornado began near Kellis Store Road where several soft and hardwood trees were snapped and uprooted. The tornado continued northeast to Weaver Sciples Mill Road where it took the roof off of a home along with a couple of load bearing walls. Numerous hardwood and softwood trees were also snapped at this location. Across the street, a portion of a roof was taken off and a shed was also destroyed. The tornado continued northeast and crossed into Noxubee County where it caused significant damage along Gholson Road. One home sustained roof damage and windows were blown out. In addition, numerous hardwood and softwood trees were snapped. Two outbuildings were also destroyed at this location. Across the street, a well built garage was destroyed along with significant damage to a couple of other outbuildings. Trees were blown down and a shop was damaged along Gholson Road. Maximum winds were around 125 mph. Total path length across both Kemper and Noxubee Counties was 6 miles.				
NOXUBEE COUNTY --- 2.1 E GHOLSON [32.93, -88.69], 3.5 E GHOLSON [32.94, -88.67]

<p>Initial damage was numerous snapped hard and softwood trees along E. Spann Road. The tornado moved northeast and caused significant damage to a dairy farm on Paulette Road. Numerous buildings were destroyed including a barn, a milk house, a silo, and a mobile home. The tornado also uprooted large trees and snapped several power poles. A horse trailer tumbled for approximately 100 yards. Debris was scattered approximately one mile to the northeast. The tornado continued on and destroyed a metal farm building and an office off of Stan Tabor Road and also pushed an 18 wheeler approximately 25 yards. The second story of a home was destroyed along with a metal building just off of Hwy 14. Numerous trees were snapped at this location with one tree being completely debarked.</p>				
<p>The tornado continued on and destroyed some metal buildings at a pig farm and also overturned a pivot. A barn was destroyed along with roof damage to a home along Stoke Williams Road. The tornado ended near Koehn Road where a few trees were snapped. The tornado was rated EF-3 based on the damage to the dairy farm and the metal building off of Stan Tabor Road. The remainder of the damage was generally EF-1 in nature. Maximum winds were around 140 mph.</p>

A portion of Sciples Mill and Thomas Mill Pond Roads were flooded.

JASPER COUNTY --- 0.6 E STRINGER [31.87, -89.26]

01/01/11 04:45 CST	0	Heavy Rain
01/01/11 06:00 CST	0	Source: Trained Spotter

Measured 2.3 inches of rain in just over an hour at Stringer.

A potent storm system brought a prolonged outbreak of severe thunderstorms to the Lower Mississippi Valley region from the afternoon hours of New Years Eve lasting through the morning hours of New Years Day. This rare combination of high instability and wind shear is mainly what supported the large outbreak that included multiple strong tornadoes. National Weather Service storm survey teams found 11 total tornadoes that occurred during this event. Of the 11, two were EF-3 and two were EF-2. Six were EF-1 with one EF-0. Damaging straight line winds also brought down numerous trees and large limbs across the area. Large hail also occurred during the event with reports ranging from quarter to golf ball size. In addition, flash flooding was a significant issue across the area. Roads were flooded in several locations, some vehicles were submerged in flood waters, and a few evacuations took place as a result of rising flood waters.

Strong and cold high pressure had settled over Mississippi by January 8th, 2011 bringing cold temperatures to the region. An area of low pressure transiting the northern Gulf of Mexico on January 9th brought an influx of moisture to the Gulf Coast states that combined with the cold air mass already in place to bring heavy snow, freezing rain and sleet to the region. The heaviest snow fell across northern Mississippi, with primarily sleet and freezing rain falling across central Mississippi.

Direct Fatalities: M72

A very cold air mass had settled over Mississippi on January 14th, 2011. Morning low temperatures on the 14th were in the upper teens across most of the region. An elderly man in the city of Columbus died of hypothermia during the early morning hours as a result of the cold air.
